Usually students do not know how to start and what to study. To crack any exam, a smart aspirant must know that the previous year exam papers can give the glimpse of the pattern of exam. Besides this targeted preparation under expert guidance coupled with unmatched study material makes the task much easier.

We help you to gain knowledge, simultaneously it also inculcates positive attitude, self-belief and high level of confidence, which is essentially required to qualify in any competitive examinations. We provide a student centric learning environment to simulate intellectual development; encourage analytical thinking that develops competitive ability.

Our goal is to enhance student's achievements by improving their knowledge base & exam taking skills. At the same time you must inculcate positive thought within and always bear in mind that only your own resolution to achieve success is more important than any other one thing.

Students are today enlightened and focused. They know what they are up to. They need just a ray of guidance. I feel I have accomplished the reason of my existence on this earth. Proud to be that faint ray of guidance, proud to be a reason of smile on certain lips, proud to be your teacher, friend and guide.

Alfred Nobel was a Swedish chemist, engineer, and industrialist most famously known for the invention of dynamite. He died in 1896. In his will, he bequeathed all of his "remaining realisable assets" to be used to establish five prizes which became known as "Nobel Prizes." Nobel Prizes were first awarded in 1901.

Map Lines

Equator Linees:-

- ❖ Everything north of the equator is known as the Northern Hemisphere and everything south of the equator is known as the Southern Hemisphere.

Latitude and Longitude

- ❖ The lines run east-west are known as lines of latitude. The lines running north-south are known as lines of longitude.

Latitude:-

- ❖ While lines of latitude run across a map east-west, the latitude indicates the north-south position of a point on earth.
- ❖ Lines of latitude start at 0 degrees at the equator and end at 90 degrees at the North and South Poles (for a total to 180 degrees of latitude). Therefore, the higher the value of degree of latitude, the closer it is to the North or South Pole.

Longitude:-

- ❖ Meridians of longitude are imaginary half-circles running from the North Pole to the South Pole.

They are sometimes called lines of longitude. Unlike parallels of latitude that are different sizes, all lines of longitude are the same length. Since every meridian must cross the equator, and since the equator is a circle, the equatorial circle can be divided into 360°. These divisions of the equatorial circle are used to label the meridians.

Major Lines

- ❖ The five major parallels of latitudes from north to south are called: Arctic Circle, Tropic of Cancer, Equator, Tropic of Capricorn, and the Antarctic Circle.

Tropic of Cancer

- ❖ The parallel of latitude that is approximately 23½ degrees north of the equator and that is the northernmost latitude reached by the overhead sun.
- ❖ The Tropic of Cancer passes through eight states of India. They are Gujarat, Rajasthan, Madhya Pradesh, Chhattisgarh, Jharkhand, West Bengal, Tripura and Mizoram.

Tropic of Capricorn

- ❖ The parallel of latitude that is approximately 23½ degrees south of the equator and that is the southernmost latitude reached by the overhead sun.
- ❖ The Tropic of Capricorn passes through a number of countries including Argentina, Australia, Botswana, Brazil, Chile, Madagascar, Mozambique, Namibia, and Paraguay.

SAARC

The South Asian Association for Regional Cooperation (SAARC) was established with the signing of the SAARC Charter in Dhaka on 8 December 1985.

The idea of regional cooperation in South Asia was first raised in November 1980. After consultations, the foreign secretaries of the seven founding countries—Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka — met for the first time in Colombo in April 1981.

Afghanistan became the newest member of SAARC at the 13th annual summit in 2005.

The Headquarters and Secretariat of the Association are at Kathmandu, Nepal.

There are currently nine Observers to SAARC, namely:

Australia, China, The European Union, Iran, Japan, The Republic of Korea, Mauritius, Myanmar, The United States of America.

SAARC comprises 3% of the world's land area, 21% of the world's population and 5.21% (US\$4.47 trillion) of the global economy, as of 2021.

The organization promotes economic development and regional integration. It launched the South Asian Free Trade Area in 2006.

The SAFTA was envisaged primarily as the first step towards the transition to a South Asian Free Trade Area (SAFTA) leading subsequently towards a Customs Union, Common Market and the Economic Union.

Summit Declarations provide directives and mandates for regional co-operation. Following are the past SAARC Summits:

- First SAARC Summit, Dhaka, 1985

Olympic Games

The Olympic Games is an international multi-sport event subdivided into summer and winter sporting events. The summer and winter games are each held every four years (an Olympiad). Until 1992, they were both held in the same year. Since then, they have been separated by a two year gap.

The original Olympic Games were first recorded in 776 BC in Olympia, Greece, and were celebrated until AD 393. Interest in reviving the Olympic Games proper was first shown by the Greek poet and newspaper editor Panagiotis Soutsos in his poem "Dialogue of the Dead" in 1833.

The International Olympic Committee was founded in 1894 on the initiative of a French nobleman, Pierre Frédy, Baron de Coubertin. The first of the IOC's Olympic Games were the 1896 Summer Olympics, held in Athens, Greece.

List of members of the International Olympic Committee

Demetrios Vikelas (Greece)	1894 - 1896
Baron Pierre de Coubertin (France)	1896 - 1925
Henri de Baillet-Latour (Belgium)	1925 - 1942
Sigrid Edström (Sweden)	1946 - 1952
Avery Brundage (USA)	1952 - 1972
Lord Killanin of Dublin and Spittal (Ireland)	1972 - 1980
Juan Antonio Samaranch (Spain)	1980 - 2001
Jacques Rogge (Belgium)	2001 - 2013
Dr. Thomas Bach (Germany)	2013 -

From the 241 participants from 14 nations in 1896, the Games grew to nearly 11,100 competitors from 202 countries at the 2004 Summer Olympics in Athens. The number of competitors at the Winter Olympics is much smaller than at the Summer Games; at the 2006 Winter Olympics in Turin Italy, 2,633 athletes from 80 countries competed in 84 events.

The 1956 Melbourne Olympics were the first Olympics to be boycotted. The Netherlands, Spain, and Switzerland refused to attend because of the repression of the Hungarian Uprising by the Soviet Union; additionally, Cambodia, Egypt, Iraq, and Lebanon, boycotted the games due to the Suez Crisis.

Symbols

The Olympic Motto:

"Citius, Altius, Fortius" in Latin words means "faster, higher, braver". The modern interpretation of the motto is "swifter, higher, stronger", expressing the athlete's goal of running faster, jumping higher, and throwing more strongly.

The Olympic Flame:

During the early Olympics a sacred flame burned at the altar of Zeus. A modern version of the flame was adopted for the Berlin Games in 1936, and the tradition has been observed ever since. The torch used to kindle the flame is first lit by the sun's rays at Olympic, Greece, and then carried to the site of the Games by relays of runners. Ships and planes are used when necessary.

The Olympic Rings:

Consisting of five interlacing rings of the color blue, yellow, black, green, and red, it represents the union of the five continents (Europe, Asia, Africa, Australia and America) and the meeting of athletes from throughout the world. The colors were chosen because at least one of them is found in the flag of every nation. The Olympic Rings are a real international emblem.

The Olympic Flag:

The flag displays the symbol of the five rings on a plain white background and is first made in the 1920 Games at Antwerp, Belgium.

The Olympic Mascots:

They are characters that stand as a symbol of Olympic Games for children of all age. Olympic mascots go back at least as far as the 1932 Los Angeles Games where a living black Scottish terrier named Smoky served as mascot of the Olympic Village.

The aftermath of the Second World War meant Japan was barred from the 1948 Olympics in London.

South Korea did not participate, however, due to the Korean War, which had started the previous year and would last until 1953.

The Games were officially opened by Indian President Rajendra Prasad at the Dhyan Chand National Stadium.

The 2022 Asian Games (to be held in the year 2023)

The 2022 Asian Games, the nineteenth Asian Games, is a multi-sport event held in Hangzhou, China from 23 September to 8 October 2023. However, the 19th edition of the Asian Games was to be held in 2022 only. But due to the Corona epidemic it was postponed and started again in 2023. Hangzhou is the third city in China to host the Asian Games. Earlier this competition had been organized in Beijing in 1990 and Guangzhou in 2010.

The Mascot of the 19th Asian Games

The mascots of the Asian Games 2022 are three sporty robots, representing the UNESCO World Heritage Sites of the city of Hangzhou. Also known collectively as smart triplets. These three robots have been named Kangkong, Lianlian and Chenchen.
